DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The expression "possibly further low boilers" in lines 6 and 13 of claim 1 renders the claims indefinite because it is unclear if low boilers are present in the stream.

The expression "possibly water" in lines 6 and 13 of claim 1 renders the claims indefinite because it is unclear if water is present in the stream.

The expression "possibly further high boilers" in lines 7-8 of claim 1 renders the claims indefinite because it is unclear if high boilers are present in the bottom stream.

The expression "the distillation column" line 8 of claim 1 renders the claim indefinite because it is unclear if the distillation column is the first distillation column.

The expression "the distillation column" line 2 of claim 2 renders the claim indefinite because it is unclear whether the distillation column is the first distillation column or the second distillation column.

Claim 8 recites the limitation "the reactive distillation column" in line 2. There is insufficient antecedent basis for this limitation in the claim. It is reminded that the present invention draws to a distillation process, not an extractive distillation process.
